

KENYATTA UNIVERSITY

UNIVERSITY EXAMINATIONS 2017/2018

DIGITAL SCHOOL OF VIRTUAL AND OPEN LEARNING

SECOND SEMESTER EXAMINATION FOR THE DEGREE OF BACHELOR OF COMMERCE

BAC 309: FINANCIAL DERIVATIVES

DATE: Saturday, 23rd June 2018

TIME: 4.30 p.m. - 6.30 p.m.

INSTRUCTIONS: ANSWER ALL QUESTIONS

Question One

- a) Highlight four differences between a forward market and a futures market. (8 Marks)
- b) An asset manager anticipates the receipt of funds in 200 days, which he will use to buy a particular stock. The stock he has in mind is currently selling for shs. 165 and will pay a shs. 5 dividend in 50 days and another shs. 5 dividend in 140 days. The risk free rate is 5%. The manager decides to commit to a future purchase of the stock by going long a forward contract on the stock.

Required:

- i) At what price would the manager commit to purchase the stock on in 200 days through a forward contract? (5 Marks)
 - ii) Suppose the manager enters into the contract at the price you found in part (i). Now, 75 days later, the stock price is shs.130. Determine the value of the contract at this point. (4 Marks)
 - iii) It is now the expiration day, and the stock price is shs.135. Determine the value of the forward contract at this time. (4 Marks)
-

- c) A stock index currently stands at shs.4000. The risk-free interest is 8% per annum (with continuous compounding) and the dividend yield on the index is 4% per annum. What should the futures price for a 4-month contract be? (4 Marks)

[Total 25 Marks]

Question Two

The Nairobi Securities Exchange recently introduced the derivatives market in the year 2014. Discuss the reasons for the slow development of this market in Kenya. (10 Marks)

Question Three

- a) Discuss five reasons why interest swaps may be of value to a corporate finance manager. (10 Marks)

- b) Company ABC and XYZ have been offered the following rates per annum of \$200 million five year loan:

	Fixed rate	Floating rate
Company ABC	12.0	LIBOR + 0.1%
Company XYZ	13.4	LIBOR + 0.6%

Company ABC requires a floating rate loan, company XYZ requires a fixed rate loan. Design a swap that will net a bank acting as intermediary 0.1 percent per annum and be equally attractive to both the companies. (10 Marks)

[Total 25 Marks]

Question Four

- a) List and explain five factors that can influence the value of a call option. (5 Marks)
- b) You have been provided with the following information:

Stock Price	Shs.100
Exercise price	95
Interest rate	10%
Time of expiration	3 months
Standard deviation	50%

- i) Apply the Black-Scholes formula to value a call option with information provided above. (6 Marks)
- ii) Find the value of the European put option on the above stock with identical exercise price and time to maturity. (4 Marks)

(Total 15 Marks)

PRESENT VALUE TABLE

Present value of \$1, that is $(1+r)^{-n}$ where r = interest rate; n = number of periods until payment or receipt.

Periods (n)	Interest rates (r)									
	1%	2%	3%	4%	5%	6%	7%	8%	9%	10%
